- Business Intelligence (research and investigation, commercial / market due diligence)
- Innovation Management (establishment and development of new services and business lines)
- Corporate Development (consultancy on cooperative ventures, mergers & acquisitions)

EXCON has a large number of qualified employees for the performance of complex consultancy and implementation projects with a wide range of objectives. Our expertise extends from the establishment of new business units with a long-term orientation for international businesses, through projects with critical timing for the avoidance of risks or loss of earnings and support in the outsourcing of business processes, to support for medium sized enterprises, groups and investors in corporate transactions.

On the basis of experience gained from our operational activities and the variety of expertise available within the EXCON Group, we are in many cases able to perform better than classical consulting companies.

We will be pleased to assist you with your specific requirements. Please do not hesitate to contact us.
