

## Pick up Services

### Save time and money in collecting and storing vehicles

It has almost become a matter of course: vehicles with expired leasing agreements, vehicles from dealer insolvencies and hired vehicles standing around unused all over the country. The time and expense involved in collecting them for further use are correspondingly great. But collection and safekeeping of vehicles are not really part of the core value chain functions of [banks, leasing companies](#) and car hire firms.

In the form of our pick-up services, we have therefore established a method of relieving the financial and organizational strain on [our clients](#). Within the scope of this function, we make contact with the vehicle keeper, agree a time for collection, and drive or transport the vehicle to a car park nominated by [our client](#).

Together with the savings in cost and time, [our clients](#) also benefit from integration with other EXCON services such as our [collateral](#), impounding or [remarketing services](#). We would be pleased to provide you with further information on the synergy effects you could expect.

#### Our services at a glance:

- Contact with the vehicle keepers and collection of the vehicles
- Transport by truck where necessary
- Documentation of any visible damage
- Transport of vehicles to the designated car park
- Documentation of the complete sequence of events
