

## **Fleet Suite**

### **EXCON Fleet Suite - The innovative Business Mobility solution**

Professional fleet management with all the associated processes and workflows is a major challenge to many fleet managers. Smart fleet software is more than ever in demand, as the costs and requirements are constantly rising.

With EXCON Fleet Suite, you not only reduce the workload, releasing important capacity for your core business, but also increase the transparency of your entire fleet. Complex administrative processes can be handled more transparently and therefore more efficiently with Fleet Suite - from entering documentation, digitally, consistently, in a vehicle-related and audit-proof system, to the appointment of service providers. You can retrieve the electronic vehicle file at any time and view or print the current status or a cost report in real time.

Fleet Suite is the fleet management platform that covers the vehicle life cycle with smart service provider links from delivery, administration, technical management and return to marketing. An independent platform with partners throughout Europe.

### **EXCON Fleet Suite is suitable for the following types of fleet:**

- Leasing fleets with and without fleet managers
- Purchased fleets with and without fleet managers
  
- Manufacturers' fleets / Car rental companies
- Car dealer fleets / Fleet customers

### **Why do you need fleet management software?**

With a large number of vehicles in your fleet, costs rapidly rise. Without smart fleet software you run the risk of generating unnecessarily high costs for your vehicle fleet.

Late leasing payments, excessive repair bills or expensive temporary replacement vehicles - all of these can cause unnecessary additional costs for you, not to mention extremely high administration costs.
